

# CS KICK-START 19 SHOW PIG STARTER

**PRODUCT CODE:** 1001

**FEED TYPE:** Pelleted

### MEDICATED - DENEGARD

35 g/ton. For control of swine dysentery associated with *Brachyspira hyodysenteriae* susceptible to Tiamulin.

### CONTAINS CLARIFLY

For prevention and control of house flies, stable flies, face flies, horn flies, and manure breeding flies in the manure of treated swine.

### FEATURES & BENEFITS

- **CS Kick-Start 19 Show Pig Starter** is a complete balanced formula to engage your swine into a healthy start. With balanced protein and energy levels, this feed will allow your pig to have the perfect combination of muscle, body capacity, and finish!
- **High Palatability** ensures pigs will eat without hesitation
- **Multiple protein sources** including milk products, fish meal, and steam-rolled oats result in excellent feed conversion and maximize performance.
- **Fixed formulations:** Our formulas use only carefully-selected premium ingredients that provide the best nutritional value.
- **Expertly Formulated:** A team of experienced nutritionists create balanced formulas to meet all the nutritional needs of your show pigs.
- **Health & Productivity:** CS Kick-Start 19 Show Pig Starter is designed to balance amino acids along with protein, fat, fiber, and vitamin levels to ensure optimal nutrition and performance.

### FEEDING DIRECTIONS

Feed as sole diet to show pigs from 40 lb to 250 lbs. Evaluate weight and condition in advance of show date. Adjust final condition if necessary by switching to CS Prime-Time 16 or CS MAX-Expression. Clean, fresh water available at all times is critical for maximum growth rate.

**WARNING:** This feeds contains supplemental copper. Do not feed to sheep.

**CAUTION:** Use as the only source of tiamulin. For swine use only. The effects of tiamulin on swine reproductive performance, pregnancy and lactation have not been determined. Swine being treated with tiamulin should not have access to feeds containing polyether ionophores (e.g., lasalocid, monensin, narasin, salinomycin and semduramicin) as adverse reactions may occur. If signs of toxicity occur, discontinue use of medicated feed.

**WARNING:** Withdraw medicated feed 2 days before slaughter following use at 35 g/ton. Protect from excessive temperatures (temperatures that exceed 40 Degrees Celsius or 104 Degrees Fahrenheit). Do not store at warm temperatures up to 104 Degrees Fahrenheit (40 Degrees Celsius) for more than 7 days.

### GUARANTEED ANALYSIS

|                          |             |
